REMARKS/ARGUMENTS

The Examiner's Action of May 31, 2005, has been received and reviewed by counsel for Assignee. In that Action the Examiner objected to the drawings, and with this response counsel includes corrected drawings. In particular, corrections have been made to Figures 3, 4(a) and 4(b). The reference to 32 is referred to in the specification on page 8, in the third full paragraph from the top.

The Examiner also objected to the specification with respect to the statement about the relative rise and fall times, and their transposition. By this response counsel has revised the specification.

In the Action the Examiner indicated that claims 5-8 would be allowable if rewritten to overcome the rejections under Section 112 and include all of the limitations of the base claim and any intervening claims. By this response counsel has canceled all claims and submits herewith new claims 11-18 which have been prepared in the manner noted by the Examiner. In particular, new claim 11 corresponds to former claim 5, amended in the appropriate manner; new claim 12 corresponds to former claim 7; and new claim 15 corresponds to former claim 6. All of the remaining claims depend directly or indirectly from these claims, and are believed to be allowable for at least that reason.

If the Examiner believes a telephone conference would expedite prosecution of this application, he is invited to telephone the undersigned at 650-324-6303 (direct).

Respectfully submitted,

Robert C. Colwell
